

Certain activities in navigable waters are exempt from needing a permit under chapter 30, Wisconsin Statutes. Using this checklist, you can determine if your project qualifies for an exemption.

Your proposed **wing deflector** is eligible for an exemption if your project will meet all the following conditions:

- ☐ The wing deflector may not be located in an area of special natural resource interest (ASNRI) – see the Designated Waters Search on DNR’s website to determine if your waterway is an ASNRI or has another special designation.
- ☐ The wing deflector may be placed and maintained only by a riparian, and shall be placed entirely within the riparian’s zone of interest.
- ☐ The wing deflector must be placed solely for the purpose of improving fish habitat.
- ☐ The riparian shall report the placement of the structure to the local department fisheries biologist within 30 days after placement. The report shall contain a description of the project and its purpose, the name of the waterway and a map showing where the structure was placed.
- ☐ A deposit of sand, gravel or stone may be associated with the placement of a wing deflector provided the deposit is limited to the area immediately underneath or within one foot of the structure and is less than 2 cubic yards.
- ☐ Dredging is not allowed for the placement of a wing deflector.
- ☐ To protect fish habitat during spawning seasons, the wing deflector may not be placed during the following time periods:
  - (a) For trout streams and perennial tributaries to trout streams, September 15 through May 15.
  - (b) For all waters not identified in (a) and south of State Highway 29, March 15 through May 15.
  - (c) For all waters not identified in (a) and north of State Highway 29, April 1 through June 1.
- ☐ Design and placement of wing deflectors shall follow the prescriptions in *Trout Stream Therapy* by Robert L. Hunt or in *Guidelines for Management of Trout Stream Habitat in Wisconsin* by Ray J. White and Oscar M. Brynildson.

Note: Copies of these publications may be inspected by contacting your local department fisheries biologist, and are available at many public libraries.
- ☐ Wing deflectors may only be placed in navigable streams which are less than 5 feet wide, measured from ordinary high water mark to ordinary high water mark.
- ☐ Wing deflectors may not extend more than 25% across the stream width.
- ☐ Proper erosion control measures shall be used during installation (to prevent soils from eroding into the waterway), removed after work is complete, and any disturbed areas restored.

If your project does not meet all of these conditions, submit a permit application to the Department.

If you have any questions about whether you meet these conditions, you may request an Exemption Determination from DNR. Obtain Form 3500-107, “Chapter 30 Exemption Determination Request” from a DNR service center, or download it from our website at [www.dnr.wi.gov](http://www.dnr.wi.gov) under the topic “Waterway and Wetland Permits.” Complete the form and submit it to the DNR office identified on the form.
